

Punkte pro richtiger Teilantwort

Um bei einer Multiple Response Aufgabe Punkte pro richtiger Teilantwort zu vergeben, muss bei der Frage die Option **Enable item scoring** aktiviert werden. Anschliessend kann bei den einzelnen Antworten festgelegt werden, wie viele Punkte pro richtigem Treffer vergeben werden sollen:

The screenshot shows the Canvas LMS question editor interface. The 'Properties' tab is active, displaying various settings for the question. A red box highlights the 'Enable item scoring' checkbox, which is currently unchecked. An arrow points from this checkbox to the 'Answer-specific feedback' section. Another arrow points from the 'Answer-specific feedback' section to a detailed view of an answer option, where the 'Score' field is highlighted with a red box and an arrow. The 'Score' field is currently set to 1. The 'Answer-specific feedback' section also includes checkboxes for 'Correct answer?' and 'Is only partly correct?'. The 'Answer-specific feedback' section is currently empty, but the 'Score' field is highlighted with a red box and an arrow.
