Swiss Learning Hub integration

The purpose of this documentation is to describe available integrations of the Swiss Learning Hub.

Integration	Description
Detail report	In the Swiss Learning Hub, a detailed report can be generated per learning content if the report definition and certain SCORM attributes are provided by the learning object.
File based API	File based user import in XML or JSON format over SFTP.
LTI	Learning Tools Interoperability (LTI) is an education technology specification developed by the IMS Global Learning Consortium, which specifies a method for a LMS to securely exchange information with external systems.
SAML 2.0	Single sign-on (SSO) with SAML
